PRAEFECTUS COLLEGII DOCTORUM BIBLIOTHECAE AMBROSIANAE.

Pater Tuus Vitalianus ardentissime promoverat hanc editionem photolithographicam Codicis Syro-Hexaplaris, quem Cardinalis Archiepiscopus Federicus Borromaeus ex Scetensi Monasterio S. Mariae Matris Dei in Aegypto Ambrosianae, quam fundaverat, Bibliothecae comparavit. Perfecta jam editio impensis Bibliothecae nulli sane meliori jure offerri potest, quam Tibi, qui Patri successisti in Bibliotheca curanda, et id praestas non minori, quam Is fecit per tot annos, benevolentia, sollicitudine et sapientia. Omnino autem Gentis Borromaeae Principi inscribenda est editio pretiosissimi ac unici maximam partem libri, quem Bibliothecae addixit alterum immortale Familiae Tuae decus Cardinalis Federicus. Accipe ergo quem offero librum ut grati et devoti animi testimonium.

Ex Ambrosiana Bibliotheca, Kalendis Novembribus, MDCCCLXXIV.

PRAEFATIO.

Codex Syrus Ambrosianae Bibliothecae *C.* 313. *Inf.* continet Psalmos, Job, Proverbia, Ecclesiasten, Canticum Canticorum, Sapientiam, Ecclesiasticum et omnes Prophetas secundum versionem, quam ex Graeco textu LXX recensionis Origenis elaboravit ineunte sec. VII Alexandriae Paulus Episcopus Monophysita Telae Mauzlath. Liber allatus fuit in hanc Bibliothecam ab ejus initio ex Monasterio S. Mariae Deiparae in deserto Sketi, ut conjicio ex duabus notis, quas videre licet in hac editione fol. 193, v., easque scriptas fuisse ab Antonio Giggeio ex primis Doctoribus Collegii Bibliothecae verisimiliter arguo et aliunde et ex aliis ejus autographis, praesertim Thesauro Arabico, in Bibliotheca servatis. Ignotum mihi tamen hucusque est, num Giggeius aliter usus fuerit hoc codice, licet diligenter versaverit alterum codicem versionis Pescito V. T. *B.* 21. *Inf.*, qui ex eodem Monasterio S. Mariae Deiparae venit in nostram Bibliothecam, cum translationis ejusdem tunc ineditae lectiones Latine versas subjecerit singulis capitibus in libro *In Proverbia Salomonis Commentarij Trium Rabbinorum;* quas lectiones e codice supradicto desumpsisse indicat ipse in titulo operis, cum addit: *His accesserunt versiones Chaldaeae paraphrasis*, *ac Syrae lectionis ex vetustissimo codice Bibliothecae Ambrosianae;* nec enim alium Pescito codicem vetustissimum Bibliotheca unquam habuit. Nec ipse immortalis Conditor Bibliothecae Ambrosianae Cardinalis Federicus Borromeus, qui eandem Pescito ineditam saepe affert in suis Commentariis in Canticum Canticorum et in Prophetas Minores ex ipso illo codice, ut arguo ex loco Habacuc III, 1, nostro codice usus est, quantum vidi, licet, cum saepe citet veteres Interpretes Aquilam, Symmachum et Theodotionem, magno auxilio versio ista illi fuisset.

Post Giggeium nullus, quantum certo mihi constat, codicem tractavit ante Johannem Baptistam Branca, Collegii Ambrosiani Doctorem ab anno 1764 ad 1799, de quo haec habet Cajetanus Bugati ejusdem collega per annos 25 in Programmate suae editionis Danielis: « Cl. Jo: Baptista Branca Ambrosiani Collegii Doctor omnium primus Codicis praestantiam agnoverat, ejusque usum in Sacra Critica usque ab anno 1767 significaverat Viris doctissimis Beniamino Kennicotto, et Paulo Jacobo Brunsio in Synopsi quinque Dissertationum ad Palaeographiam Orientalem spectantium, quam una cum fasciculo Variantium Lectionum nostrorum Hebraicorum Codicum eisdem transmiserat Oxonium.... Sexennio post Mediolani commoratus celeberrimus peregrinator Suecus, Jac. Jonas Bjornstahl, cum alios Codices Biblicos bene multos, tum hunc Hexaplarem diutissime pertractavit, locaque ejus insigniora, Branca nostro praeeunte, facemque praeferente, adnotavit, eorumque notitiam cum amicis suis communicavit, atque in primis Withio Oxoniensi Professori, et Giorwellio Stockolmae Bibliothecario ». Quae Bugati dixit, eadem fere occurrunt ante eum ab aliis prolata in De Rossi, *Specimen ineditae et Hexaplaris Bibliorum Versionis Syro-Estranghelae*, Parmae, 1778, VI, et in *Repertorium fuer Biblische und Morgenlaendische Litteratur, III,* 166 *et* 172, Leipzig, 1778.

Quae de Björnståhl innuit Bugati, habentur in *Repertorium* l. c. ubi Bruns tum excerpta literarum de codice protulit illius et Jo. Baptistae Branca, tum locos codicis dedit, quos ille descripserat; ibique repetitum fuit statim postea Specimen De Rossi, qui Diatribam de codice praemisit Psalmo I, quem ipse descripserat anno 1777, ut ex Programmate editionis Danielis Bugati patet.

Exeunte anno 1778, quo duplex notitia codicis prodiit, Matthias Norberg Mediolanum venit et maximam partem codicis descripsit: anno autem 1787 edidit Londini Gothorum Jeremiam et Ezechielem. Cf. ejusdem Praefatio et jam allatum Programma Bugati.

Sequenti anno 1788 Cajetanus Bugati Doctor Collegii Ambrosiani edidit Mediolani typis et impensis Bibliothecae Ambrosianae Danielem; Psalmos deinde impresserat, sed praestolatus editionem LXX Roberti Holmes, ut Praefationem conscriberet, obiit anno 1816, et prodiit demum liber anno 1820. Cf. notitia de eo praemissa editioni Psalmorum.

Norberg editione intermissa apographon suum donavit Henrico Middeldorpf, ut hic testatur in suo opere *Codex Syriaco-Hexaplaris*, p. IV; qui primo usus eo est in libro *Curae Hexaplares in Jobum e codice Syriaco-Hexaplari Ambrosiano-Mediolanensi*, Vratislaviae, 1817, deinde anno 1835 ibidem edidit in libro primo allato Esaiam, Prophetas minores, Proverbia, Jobum, Canticum, Threnos et Ecclesiasten.

Demum anno 1861 typis et impensis Bibliothecae Ambrosianae ipse edidi in opere *Monumenta sacra et profana*, Tom. I, Baruch, Threnos et Epistolam Jeremiae tanquam specimen novae editionis totius codicis nostri. Nec consilium, quod ceperam, unquam postea deposui, licet editionem intermitterem, ut prius, sicut ex ordine librorum par erat, vulgarem alios ejusdem versionis codices asservatos Londini in Museo Britannico, qui etiam, exceptis Judicibus et Ruth, erant inediti; atque ineunte anno 1866 jam nostrum codicem praeter Danielem totum descripseram integre.

Sed eo fere anno accidit, cum id nec cogitarem, quod hanc editionem photolithographicam promoturum erat. Cum enim aliquot photolithographiae specimina vidissem, statim senseram quantum juvaretur palaeographia, si vetustissimis codicibus Ambrosianae Bibliothecae, quos edere vel coeperam vel proposueram, tabulas eadem arte confectas adjungerem; ideoque coepi hortari juvenem photographum Angelum Della Croce, ut eam investigaret, et similia conaretur. Non renuit is, et mense octobri anni 1868 declaravit mihi se jam pervenisse quo tendebat, ac proposuit non modo specimina ex codicibus Ambrosianis describere, sed suis impensis edere totum codicem Syro-Hexaplarem, dummodo centum illi subscriptores operis conquirerem, et operam meam, quae utilis vel necessaria esset, praestarem. Ex iis quae mihi dixit, vidi statim rem multo minores impensas requirere, quam unquam suspicatus fuissem; et dum ex una parte minus generosum putabam, ut suis impensis opus assumeret, ex

altera a Conservatoribus Bibliothecae confidebam me impetraturum, ut istius sumptu editio susciperetur, quod et a sollicitandis subscriptoribus liberaret me ab istiusmodi plane abhorrentem, et plenam in opere dirigendo auctoritatem conferret, conjunctam, ut sperabam, cum ipsius operis emolumento. Non rejecta ideo illius propositione, respondi me curaturum, ut is opus susciperet quidem, sed non suis impensis, verum Ambrosianae Bibliothecae, et justum suae operae praemium ab ista reciperet. Convenimus statim, et ipse rem proposui primo sodalibus meis Collegii Ambrosiani, penes quos erat judicium de operis edendi utilitate, Praefecto nempe Sac. Bernardo Gatti, et Doctoribus Sac. Aloysio Biraghi ac Sac. Johanni Crivelli, qui omnes statim summo favore rem comprobarunt; deinde detuli Conservatoribus Bibliothecae, penes quos erat auctoritas decernendi, ut ejusdem sumptu opus perficeretur. Erant tunc Conservator perpetuus jure familiae Excellentissimus Comes Vitalianus Borromeo-Arese, et Conservatores quinquennales Illustrissimi ac Reverendissimi Domini Aloysius Prevosti, Aloysius Maestri, Franciscus Maria Rossi, admodum Reverendi Paulus Nardi et Angelus Cattaneo, quorum Collegii Procurator erat admodum Reverendus Franciscus Schiatti. Statim ac rem proposui, approbarunt benevole, ac me invitarunt, ut, omnibus examinatis quae e re essent, programma totius operis proponerem.

Accidit interea, ut lectis iis quae de meo proposito typis edendi quidquid adhuc supererat versionis Syro-Hexaplaris dixerat Fridericus Field in suo opere *Origenis Hexaplorum quae supersunt*, in Monito in Librum Threnorum, pro nostro epistolarum commercio ei nunciarem de mea spe edendi photolithographice codicem Syro-Hexaplarem Ambrosianum. Qui statim rescripsit se mittere operis promovendi ergo quinquaginta Anglicas libras, meque eas statim a nummulario Mediolanensi recepturum, qui reapse jam solvendi mandatum acceperat antequam ad me nunciae literae ipsae pervenirent. Acceptissimum sane fuit mihi subsidium, eoque magis gratum, quod Conservatoribus et Doctoribus Bibliothecae summopere commendabat opus, de cujus utilitatis judicio mihi uni confidenter crediderant, quod sicut non sine grato animo sentiebam, ita nec poteram rei gravitate non affici. Itaque post hoc subsidium alacriori, si fieri potuit, studio rem omnes promoverunt, et me programma proponente in Collegio Conservatorum, primus Excellentissimus Comes Borromeo-Arese declaravit nulli a Bibliotheca sumptui parcendum in hoc opere perficiendo, eique ceteri Conservatores et Procurator plene plauserunt, ac rei totius curam mihi commiserunt.

Statim ergo cum photographo Angelo Della Croce opus incepi, qui die 2 Julii anni 1869 primas tabulas photographicas desumsit, ac indesinenti opera prosequitur ea diligentia et constantia, quae facultates, ut ita dicam, multiplicant; quo autem effectu, editionis inspectores ipsi judicare possunt, illud etiam considerantes primum hoc esse hujusmodi opus ab eo susceptum. Pro parte autem lithographica idem Della Croce assumsit lithographum Johannem Tenconi juvenem paris cum eo alacritatis et industriae.

Interim anno 1870, perseverante Conservatore perpetuo Comite Vitaliano Borromeo-Arese, et Procuratore Schiatti, novi quinquennales Conservatores electi fuerunt Illustrissimi ac Reverendissimi Joseph Ferrazzoli, Ambrosius Vitali, atque admodum Reverendi Caesar Bertoglio, Julius San Pietro et Michael Mongeri, et defuncto Gatti Doctor suffectus fuit Sac. Antonius Ceruti: isti quoque eodem favore opus prosecuti sunt.

Demum non aequum est silere studium, quo opus statim post inceptionem prosecutus est Robertus L. Bensly, qui subscriptores, qui partem impensarum subministrarent, conquirere proposuerat, si id e re esset. Si liberalitas Conservatorum Bibliothecae me a curis sumptuum solverat, id nihil benevolae illius sollicitudini detrahit.

Codicis describendi onere ipsa editionis ratio me levavit, vix ullis exceptis. Codex est membranaceus, et membranae non tenues sunt, ut vetustissimorum codicum, sed paullo crassiores, at diligentissime praeparatae et nitidissimae, nisi quid ex vetustate passae sunt. Fere ubique codex optime servatus est. Altitudo foliorum est 0,37 mensurae *metricae*, latitudo 0,27-28: altitudinem et latitudinem scripturae indicat editio ipsa, quae eam refert, nisi quod charta imminuitur fere 0,005 in altitudine et in latitudine, quia siccando post impressionem contrahitur, et praeterea ipsae tabulae photographicae, licet semper ab eadem distantia desumptae, minimum quid differre in mensuris a codice possunt. Demum codex atramento exaratum est, sed tituli, notae plurimae capitum et lectionum ecclesiasticarum aliaque similia, ornatus, saltem in parte majores interpunctiones, et aliqua alia interdum, minio solent scribi; imo nec alii colores desunt in numeris interdum, interdum in ornatibus aliisve similibus. Cum scientiae juvandae opus edatur, putavi impensis parcendum in re, quae nulli vel fere usui fuisset ex hac parte, nec chromatolithographiam in auxilium advocavi; praesertim quod istud grave impensarum incrementum opus impedire potuisset. In Commentario critico brevi ratione ista omnia indicare licebit.

Esset quidem hic locus indicandi, qua ratione opus perficitur, ut de editionis fide lectores judicent; sed quia opere demum completo plene de eo toto dicere licebit, id post notas praestabo.

Notarum haec est conditio, ut suppleant quae ipsa photolithographia repraesentare non potest, et indicent si quid aberraverit. Deinde summatim afferent codices et auctores, in quibus aliquae partes libri Ambrosiani servantur, et si quid supplementi aut correctionis inde suppetierit, praebebunt; collatio tamen plena Commentario critico separatim postea edendo reservatur. Demum, ut usus libri facilior sit vel ante hunc Commentarium, indicabo breviter, quantum hucusque novi, ubinam reperire liceat textus Graecos scholiorum et locorum, frequentissime occurrentium in codice, SS. Patrum aliorumque scriptorum. Pro textu LXX interim suppetit opus Holmes-Parsons, et pro lectionibus Interpretum opus elaboratissimum Friderici Field, *Origenis Hexaplorum quae supersunt*, in quo una cum Graecis eorum reliquiis etiam illae codicis Ambrosiani diligenter afferuntur ac discutiuntur. Ceterum licet sperem me omnia praestiturum in his notis, quae ad plenam conditionem codicis et editionis et ad alia modo indicata attinent, si quid defecero, in Commentario critico supplebo.

NOTAE.

PSALMI.

Psalmorum duplex exemplar, mutilum valde utrumque, est in codice Musei Britannici, sec. VIII, *Add. Ms.* 14,434: hunc codicem totum contuli semel, plura bis, semper vero revisi, quae descripsi ac in Ambrosiano desunt. Tertium, idque completum puto, exemplar est in codice III Syriaco Bibliothecae Parisiensis, *rue Richelieu*, sec. fere XIII, quod tamen vix ullas lectiones Interpretum servavit, et pro sua conditione nihil vel fere praestare potest: vix aliquid contuli hucusque. Quartum Psalmorum recens exemplar, sed vix aliquot foliorum, est in Museo Britannico, *Add. Ms.* 17,257; nihil in margine habet. Hos codices noto B, C, D, E; codex Ambrosianus est semper A.

Ex Syris auctoribus solos novi aliquid Psalmorum referentes Bar Salibi et Bar Hebraeum. Prior multa Psalmorum attulit in suo Commentario manuscripto in Vetus Testamentum, qui exstat in Bibliotheca Parisiensi jam dicta; sine nota erat, cum plura descripsi, quia recenter emptus fuerat. Bar Hebraeus in suo opere *Horreum Mysteriorum* plura affert tum textus tum lectionum Interpretum ac Patrum. Delibavit ex eo nonnulla Dudleius Loftusius in VI Polygl. Londinensium (part. III, pag. 44), plura ex Interpretibus praesertim selegit Paulus Jacobus Bruns et edidit in (Eichhorn) *Repertorium*, tomo XIII, pp. 182-197, demum integre ediderunt Prooemium et Scholia in Ps. I, II, XXII (XXI) Tullberg, Upsaliae 1842, in Psalmos V, XVIII (XVII) Rhode, Vratislaviae 1832, in Psalmos VIII, XL, XLI, L (XXXIX, XL, XLIX) Schroeter, Vratislaviae 1857, in Psalmum LXVIII (LXVII) Knobloch, Vratislaviae 1852.

Codex Ambrosianus initio mutilus est uno folio, cum primus Quinternio novem foliis constet, et nonum post continuata in textu integro cetera praecedentia uniatur sine interruptione decimo quod est primum Quinternionis secundi. Primum folium, quod deest, ex usu non raro librorum Syrorum in verso scribi incipere poterat. Quae vero nostro desunt ex parte supplet mutilus item, sed minus, codex B fol. 1 et fol. 2 r. l. 15: etiam lineolis inclusa perierunt.

Mutilus, ut patet, incipit etiam B, et cum hujus lineae 33 fol. 2 respondeant lineis 28 codicis A fol. 1, r. a, lineae priores 15 fol. 2 r. codicis B, lineae fere 48 folii 1, quod nunc restat, et lineae 48 fere folii, quod saltem deest in codice mutilo, efficiunt lineas 111, quae proportione facta satis respondere possunt lineis 104 fere, quas folium primum versum codicis A habebat, praesertim quod characteres nunc contractiores, nunc majores sint in A, et in folio 1 r., ut apparet, sint contractiores. In duobus fragmentis codicis B lineae super numeris, si recte memini, certo vox ܥܒܕܢ in fine prioris, et titulus secundi minio exarantur, itemque linea inter primum et secundum, quae forma et ornatibus similis est illi quae occurrit in A f. 1. r. a post lineam sextam.

Fragmentum primum anonymum occurrit etiam in opere P. Lagardii *Analecta Syriaca*, p. 86, l. 26-30, sed valde in vocibus immutatum. In codice B f. 1. r. a numeri ܙ lin. 4, ܚ lin. 5, ܛ lin. 6, ܝ lin. 7, ܟ lin. 8 indicant numerum progressionis, sive ordinem temporis Psalmorum qui afferuntur; sed omissi fuerunt praecedentes numeri sex, tot enim Psalmorum notae temporum collato De Lagarde praecedebant. Horum ratione habita et scholii ad 3 Reg. versionis nostrae, III, l. 16 in Holmes-Parsons, quod mox afferam, supplevi lin. 8. ܡܚܕܒܐ. ܟ̄ܐ. A linea 9 ad 15 affert fere sine varietate Bar Hebraeus in Prooemio sui Horrei Mysteriorum in Psalmos, ed. Tullberg, p. 1, l. 9-12, ex quo supplevi ܟ̄ܐ linea 9, et alia postea. Cetera prioris Fragmenti nondum reperi Syriace.

Auctor Fragmenti primi codicis B ex opere Pauli De Lagarde esset Hippolytus, sed omnino ut in Catenis Graecis in miscello codice Musei Britannici *Add. Ms.* 12154, quo usus est De Lagarde, uni auctori tributa videntur quae diversorum sunt. Codex enim B secundo Fragmento non praemittit voces ܕܡܠܬܗ ܡܢ ܕܡܠܬܗ ante nomen ܕܐܦܘܠܝܛܘܣ, ut fol. 3 facit cum A f. 1. v., ubi alterum fragmentum S. Basilii addit priori, qui mos alibi obtinet in nostro codice A et in aliis. Praeterea Bar Hebraeus, qui ex nostra versione assumpsit fragmenta Patrum in suo Prooemio, ut ex ordine eorum et versionis consonantia patet, diserte Athanasio tribuit. Scholion 3 Reg. III supradictum nostrae versionis idem confirmare videtur; sic enim habet: ܡܛܠ ܕܡܢ ܗܪܟܐ ܐܦܘܠܘܣ ܕܡܫܘܚܬܐ ܡܬܡܢܝܢ ܒܪܗ ܕܫܢܝ̈ܐ ܡܬܡܢܝܢ ܙܒܢܐ ܕܡܙܡܘܪ̈ܐ ܕܠܘܬ ܗܘܐ ܢܣܒ ܕܒܘܝܢ ܡܬܐܠܦܝܢ ܡܢ ܐܘܪܚܐ ܕܟܘܪܣܝܘܬܐ. ܒܘܝܢܐ ܕܝܢ ܡܬܐܠܦܢܘܬܐ ܒܘܝܢ ܡܢ ܡܪܢܐ ܕܐܬܢܒܝܘܬܐ ܕܙܒܢܐ ܡܙܡܘܪ̈ܐ ܡ̄ܓ. ܐ̄. ܣܠܒܗ. ܩܛܠܐ ܕܒܘܝܢ ܒܪܗ ܕܡܬܡܢܝܢ. Demum prior pars loci, quam dat Bar Hebraeus ullis intermissis, reperitur in S. Athanasio apud Montfaucon *Collectio Nova Patr. II*, 70. Pars autem Fragmenti primi codicis B Graece exstat in Polyglott. Londin. VI, pars VI, 137, et alibi. Sed conferendus etiam Eusebius in Montfaucon, opere allato, I, 7, 298-300. Alia Graece nondum reperi, sed quae de metris Hebraeorum tractant, habet Latine ad literam codex Bibliothecae Ambrosianae *I*, 6, *Sup.* f. 6, v. in anonymo brevi tractatu de Psalmis, in quo plura nostrorum Excerptorum occurrunt, cui serior incorrecta manus inscripsit *Epistola S. Hieronymi presbyteri de Auctoribus Psalmorum extracta de Origene.*

Excerptum secundum codicis B Hippolyti est, ut titulus indicat, et confirmat Bar Hebraeus, qui in suo Prooemio allato, post primum Fragmentum S. Athanasii, p. 1 et 2 nonnulla Hippolyti habet, quorum priora mutila habet B, quae partim ex Bar Hebraeo supplevi, cetera exstant in A et B. Etiam codex Musei Britannici 12154, p. 28 A seqq. editus a De Lagarde in *Analecta Syriaca* p. 83-87 habet p. 83-86 l. 2 locum Hippolyti ab initio in B ad fol. 1. r. b. l. 29 in A cum levi versionis varietate, ut plurimum idiomatica, quae sinit ut ejusdem versionis nostrae paullulum mutatae esse videatur; quae sequuntur in De Lagarde 86, l. 2-7 Hippolyti non videntur, sed alius scriptoris, et eadem sensu tum in aliis, tum in S. Epiphanio occurrunt (vide infra ad f. 6. r. codicis A); de aliis versus finem vide supra ad primum Fragmentum. Ex opere Pauli De Lagarde liceat apponere initium in ipso B mutilum passim: ܡܙܡܘܪ̈ܐ ܩܕܡ ܐܝܠܝܢ ܟܠܗܘܢ ܡܢ. ܠܗ ܕܝܢ ܠܟܠܗܘܢ ܐܝܟ ܕܐܢܫܝܢ ܡܫܬܪܝܢ ܕܕܘܝܕ ܐܝܠܝܢ. ܐܠܐ ܐܦ ܕܐܚܪ̈ܢܐ ܡܙܡܘܪ̈ܐ. ܐܝܠܝܢ ܕܫܠܡܘܢ ܘܕܝܢ ܘܐܝܬܝܗܘܢ ܐܦ ܕܡܫܐ ܕܡܙܡܘܪ̈ܐ ܡܢ ܥܣܪܐ ܕܠܘܝ̈ܐ. ܕܐܝܠܝܢ ܗܠܝܢ، ܐܣܦ. ܗܝܡܢ. ܐܬܢ. ܐܝܬܝܬܘܢ. ܠܗܠܝܢ ܕ ܡܙܡܘܪ̈ܐ: ܠܒܢܝ ܕܩܘܪܚ ܐܝܟ ܡܢܐ. ܦܘܫ. ܗܢ ܠܐܠܗܢ ܗܢ ܡܢܗܘܢ ܕܢܩܘܢ ܐܝܟ ܡܢܐ ܠܚܒ. ܗܢ ܡܙܡܘܪܝܢ ܗܘܘ ܠܗܘ ܩܕܡ ܐܪܘܢܐ ܕܡܫܟܢܐ ܕܙܒܢܐ. ܗܢ ܠܗܠܝܢ ܠܗܘ ܡܙܡܘܪܐ ܠܒܢܝ ܩܘܪܚ ܕܐܝܠܝܢ ܕܝܗܘܢ ܠܗܘ ܕܥܠܡܝܢ ܕܐܢܬܘܢ ܠܚܝܬܘܢ ܡܢ ܩܘܪܚ. ܠܗܘܢ ܓܠܝܢܐ ܕܩܕܡ ܕܠܗܘܢ ܠܗܕܝܢ et cetera ut in B. In hac autem editione videntur mihi omissae lineolae super numeros, quae ex more Syro apponi solent,

et reapse idem fit in ipso codice 12154 statim post excerptum De Lagarde f. 33. v. in alio excerpto Origenis, de quo cf. infra ad f. 5. v. codicis A. In B f. 2. r. post lineam 10 ܘܬܫܒܘܚܬܐ ex libro De Lagarde fortasse deest ܫܘܒܚܐ ܐܦܣܟܪܘ· ܘܡܫܒܚܝܢ

Graecum textum Hippolyti totum non reperi hucusque, plura prioris partis similia et contracta in Patribus ante Psalmos, quos non vacat hic recensere; pars codicis A, f. 1. r. b, l. 12-29, sed non sine varietate, exstat Graece in codice Bibliothecae Ambrosianae *B.* 106. *Sup.*, f. 19. r. Lin. 44-47 ut Hippolyti refert Chrysostomus apud Agellium, Comm. in Ps. Prooem. p. 17. A voce autem ܡܙܡܘܪ̈ܐ f. 1. r. b. l. 6 a fine ad vocem ܕܡܙܡܘܪܐ f. 1. v. a. l. 7 exstant in Eusebio apud Montfaucon, Collectio nova PP. I, 6, C. Demum quae dedi ex B, et deinde quae habet A ad col. 2, l. 43, f. 1. r. cum varietate sunt in codice Arabico Bibliothecae Ambrosianae *Et*, 1, *Sup.* Quae ut Hippolyti exhibet liber *Acta Martyrum ad Ostia Tiberina* p. 439-448, denuo edita in libro *Hippolyti quae feruntur* ed. De Lagarde 187-194, vereor ut quid Hippolyti ad literam saltem contineant, et prudenter cavit De Lagarde in praefatione libri, ne omnia quae edebat Hippolyti esse affirmaret. Priora 439, Lag. 187, l. 26-188 l. 7 sunt Eusebii, Montfaucon, Collectio nova PP. I, 7, E, infra in A f. 2. v. Quae sequuntur ad 444 Lag. 188, l. 8-191, l. 10, praeter ψαλτηριον-φθογγος 440, Lag. 189, l. 4-12 quae non reperi alibi hucusque, sunt omnia Origenis in codice A, f. 5. v. Post Origenem sequuntur ad l. 17 nonnulla S. Basilii, Opp. I, 91, D, ed. Maur., in codice A f. 1. v. Denique 447, Lag, 193, l. 2-10 sunt S. Epiphanii, II, 162, ed. Colon., in codice A f. 6. r. Cetera nondum eadem alibi reperi.

F. 1. r. Nonnihil passum est folium rectum ex confricatione, et alicubi paullum obfuscatum ac maculatum, quin tamen quid in totum perierit; editio conditionem codicis fideliter refert, sed evanida adhuc paullo melius ex tenui umbra scripturae legere licet in ipso codice.

Col. *a*, l. 8-24 literis numerorum vice usurpatis duplex linea, superior nigra et inferior rubra, sed fere alternatim rubrae superinducta flava usque ad lin. 17, viridis lin. 18 et 19: a linea 25 ad 35 nigrae lineae supponitur flava; deinde ad finem columnae in textu solum nigra linea superscribitur vel nulla, in marg. viridis vel rubra. Literae numerorum vice fungentes atramento scribuntur praeter appositas in margine, quae exceptis ܫܘ viridibus ceterae flavae sunt. Contextus a lin. 16 ad finem columnae majori ex parte minio scribitur.

L. 10. ܬܡܢܝܢ, duabus lineolis serioribus literae priori ascriptis videtur reprobari numerus; B omittit, sed tuetur De Lagarde, qui omittit ܘ· ܠܘ ܠܝܢ: et omnino tres numeri in A abundant ratione subducta contra summam, quae quater vocibus, non literis, indicata est in A et B.

L. 19. Lineola inter ܦܢ̈ et ܦܘ evanida et serior, fortasse casualis.

L. 21. Super ܒܝܢ lineola rubra adeo evanida est, ut in editione non repraesentata fuerit; alicubi lineolarum vix vestigia in editione quia evanidae in codice sunt.

L. 23. Punctum super ܡ macula est. Et sic maculas codicis indicabo, quae impedire possint lectorem, alioquin reticebo. Si vero non ex codice, sed ex editione ipsa macula inducta fuerit, et nota digna sit, declarabo.

L. 24. De Lagarde, ܡܢ. ܕܦܢ. ܕܦܢܝܢ. B cum A ܡܢ. ܦܢܝܢ

L. 28. Post ܒܫܢ̈ deficit B.

L. 29. Vox maculata in ipso codice est ܘܕ̈ܪܬܢܝܢ. Et semper, ubi vox, quae in editione imperfecte redditur, in codice male se habet, eam apponam quin aliud notem, modo indubia sit saltem ex reliquiis.

Ex contextu ipso et ex De Lagarde pro ܘܬܬܠܐ legendum ܘܬܬܠܒܫ̈ܢ, vel ܘܬܬܒܫ̈ܢ, sed illud usus codicis in hac columna postulat.

In calce margo abscissus priorum 9 foliorum, et linea editionis conditionem abscissionis repraesentat.

Voces [Syriac] non solum Bar Hebraeus omittit, quod cum excerpat nihili esset, sed etiam Graecum, et additamentum fortasse sunt consarcinatoris codicis miscelli. Vocem ܗܘ ante ܕܟܬܝܒ habet vere codex, sed omittit Bar Hebraeus recte. Quae sequuntur post ܗܠܠܘܝܐ non habet Graecum, et fortasse additamentum sunt consarcinatoris, ut supra.

In medio fracta est. L. 1 *enterpretationem*, *e* 1º correctum *i* 1 m. L. 6 *et Beli* cum indice inferius manu seriori.

Codici connexa nunc sunt duo folia chartacea. Prius parvum sec. XVIII vel XIX continet translationem Latinam notae Syriacae f. 193 *v.* Alterum, plicatum in duo, in prima pagina continet Alphabeta Hebraicum et Syriaca hujus codicis et Maroniticum scripta a J. Rogers, qui subscripsit *J. Rogers Canon of Exeter Cathedral*, et auctor est libri: *Reasons why a new edition of the Peshito... should be published. Oxford*, 1849. In hac pagina item scripta fuit hoc seculo nota codicis *Cod. Siriaco Estranghelo C.* 313. *inf.* Utrumque folium inutile duxi repraesentare.

In fol. 195, 196 editionis photolithographice repraesentata est externa facies utraque tegminis. Constat hoc duabus ligneis tabulis nuceis altis 0,37, latis 0,27 et crassis 0,01 fere. Interius autem utraque tabula tecta est charta, sed in extremis sub ea sunt plicaturae pelliceae ex tegmine externo,

quod prius erat ex pelle fusca, huic autem alia rudior nigra superposita, quae tamen fere ubique periit, relicta priori plus minus intacta. Haec prior pellis insculpendo ornata est in utraque tabula externa, et in superiori et inferiori parte Graeca ista insculpta sunt: ab initio codicis ex ordine Syriaco: ☩ ΒΙΒΛΟΣ Α̅ ΤΩΝ ΘΕΙΩΝ ΓΡΑΦΩΝ ΠΑΛΑΙΑΣ ΚΑΙ, et a fine codicis ΝΕΑΣ ΔΙΑΘΗΚΗΣ ΔΙΑΦΕΡΕΙ ΔΕ ΒΑΣΙΛΕΙΩ ΔΙΑΚΟΝΩ ☩. Ut patet alius codicis tegmen fuit, Syro demum aptatum; pro conditione tabularum tamen non liquet utrum talis ordo fuerit et in Graeco libro, an mutatus in nova compactione. Dorsum primae compactionis cum pauca parte proxima omnino periit. In editione photolithographica insculpti ductus sive literarum sive ornatuum et avium ad quatuor latera, nisi perierint, ductibus albis relati sunt, et satis apparent per se damna prioris et reliquiae secundae pellis. Aetatem tegminis et ejus instaurationis nescio dicere.

Post diuturnum codicis usum vix ulla de eo addenda video iis, quae supra dixi p. 2, vel in notis data occasione. Ad scripturae ordinem lineae sicco instrumento ductae perpendiculares, saltem de more, nec vacat an ubique omnino inquirere, eaeque hac ratione, ut propria linea includantur utrinque tum columnae textus, tum margines lectionum dextri in columna *a*, et sinistri in columna *b*: una autem linea ducta in fronte ad latitudinem paginae pro initio textus. Aliae quoque lineae hujusmodi interdum occurrunt pro marginibus superioribus et inferioribus, et cum post vacuum spatium novus liber incipit. Ad dirigendam ductionem linearum perpendicularium tenuissima foramina in summo et imo folio facta semel pro utraque pagina, sed non semper id factum superius et infra pro singulis lineis, nisi leviter tacta interdum membrana impressionem amisit ex longa aetate. Ex punctis istis litera prior et ultima textus marginisve vel proxima aliquid interdum aut mota loco, aut etiam passa est. Finem columnae de more indicant ipsa puncta. Puncta ista in editione delevi de more.

Codex seculi VIII mihi omnino videtur, sed quisque ex editione judicare potest.

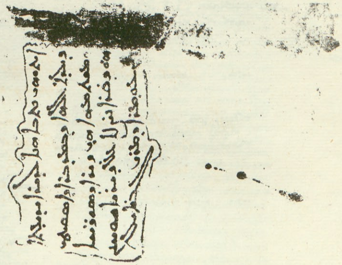

Notae Latinae ad unam omnes seculi XVIII sunt, quantum memini, praeter duas quas supra p. 139 indicavi et ad Giggeum retuli. Appositae illae videntur occasione qua codicem tractarunt Doctores Bibliothecae Ambrosianae Branca et Bugati, cf. supra p. 1, sed ex scriptura Amanuensi eorum, non ipsis referrem, saltem plerasque. Ut in notis ad Ps. XVII, 12, indicavi, notas istas pro Capitulis neglexi, si photographiam impediebant.

Ratio editionis demum haec fuit. A folio 73 incepta progressa est ad fol. 96, deinde a fol. 1 ad 72, postea a fol. 173 ad fol. 178, quae omnia prior lithographus expressit e lapide; cetera folia ex ordine expresserunt Mauri et alius lithographus; photographicos lapides omnes paravit Della Croce. In foliis 73-96 ipse Della Croce vel alii in ejus officina aliquatenus ea poliebant inspectis vitro photographico et exemplari photolithographico a me ex codice notato, ac dein ipse rem perficiebam codice et vitro collatis. In ceteris foliis autem totam hujusmodi curam ipse suscepi, ac vix quid ante me curabat lapides ipse Della Croce. Cura mea autem tota erat, ut adamussim codex repraesentaretur; ideoque etiam maculae seriores praeter ullas in marginibus servatae fuerunt ubique, vel fere saltem, postquam eas elueram in fol. 73-96, 3-6. Quoniam vero tum pro ratione photographiae, tum pro hujus in lapidem translatione vel maculae novae inducebantur alicubi, vel non plene omnino alicubi literae repraesentabantur, illas tollendas, has integrandas curabam, quatenus tamen in codice ipso erant omnino. Literae quidem integrae in toto opere omnibus locis computatis vix viginti fere exciderunt omnino, quas ex codice supplevi, et vitro photographico, nisi ipsum defecerat, ob oculos posito. Quantum vidi, una tantum integra vox marginalis periit, et me fugit, Is. XLVIII, 2, ut in notis indicavi. Sed ut haec omnia fideliter praestarem, exemplar ex lapide cum codice totum conferebam duabus successivis vicibus, ac lapidem ex eo et vitro expoliebam vel resarciebam, in tertio demum exemplari ex secundo et codice inspiciebam si recte codex erat repraesentatus. Vix quatuor fere paginas in Psalmis optime redditas semel contuli totas cum codice. Post has curas lithographus operabatur.

Pro notis quidem in animo erat, ut editionem cum codice totam conferrem, sed tempus me defecit: pro Commentario, de quo cf. p. 2, id faciam, in quo etiam correctiones notarum et additiones dabo; nunc contentus fui, ut totum codicem perlegerem, et seorsim editionem, et ex utraque lectione quae e re erant enotarem. In codicibus exteris afferendis usus sum collatione ut plurimum non repetita, nisi ubi illi lacunas A resarciebant; facile ergo fuit peccare praesertim omittendo.

Pars Testamenti Veteris Syro stylo iuxta interpretationem Septuaginta.

Psalmi. Iob. Prouerbia Salomonis. Ecclesiastes. Cantica Canticorum. Sapientiæ liber. Sapientia Iesu Sirach. Duodecim Prophetæ minores. Ieremias. Baruch. Threni. Epistola Ieremiæ. Daniel. Historia Susannæ et Beli. Ezechiel. Esaias.
